PROJECTS

www.buymestuff.com.au – Melbourne, Australia

Role: Web Developer & Designer Technologies Used: Yii, Angular JS

BuyMeStuff is a new online marketplace that simplifies the buying process. Shoppers have a whole new way of bagging bargains on their favorite things from the comfort of their couch. The platform delivers big benefits for both buyers and retailers.

Something New:

- Created an automated pricing system, which generates different prices for the products to increase profit levels of the retailers, without any lose in the number of sales.
- Developed the mobile version of the website, which is easy to use from handheld devices

www.ecolifeinternational.com – Melbourne, Australia

Role: Web Developer Technologies Used: Magento

Developed an ecommerce website using PHP CMS Magento. It has got easy to use interface for both the seller and customer to manage their products.

www.geeksonearth.com – Melbourne, Australia

Role: Web Programmer

Technologies Used: Cake PHP, Angry CURL

Developed a Cake PHP Based website scrapper. It grabs data from other websites and inserts into this website customizing the data. It connects to the other websites using proxy hiding the original IP of the server.

www.limelightonline.com.au – Melbourne, Australia

Role: Web Developer & Designer

Technologies Used: Codeigniter

Developed a CRM system to manage customers' data, project management, and invoice management using codeigniter.

www.tastebuds.com.au – Melbourne, Australia

Role: Web Developer

Technologies Used: Magento

Developed a custom shipping module for selecting preferred delivery date based on user location and time of the day.
